SUMMARY
Final year Computer Science student with hands-on experience in applied deep learning and computer vision. Built and deployed two production ML services and contributed to an open source NLP library. Comfortable owning a feature end to end from data pipeline to a monitored API. Looking for a team where I can own the model while others own the product surface.

EDUCATION
B.Tech Computer Science and Engineering, 2022 - 2026
Anna University

SKILLS
Python, TensorFlow, PyTorch, Computer Vision, NLP, scikit-learn, Pandas, NumPy, OpenCV
Docker, Git, Linux, REST API, FastAPI

EXPERIENCE
Machine Learning Intern, Zeta Robotics (June 2025 - December 2025)
Built an object detection pipeline in PyTorch that improved mAP by 12 percent.
Deployed the model behind a FastAPI service on AWS with Docker.

PROJECTS
LeafScan: plant disease classifier trained on 54000 images using transfer learning.
QueryBot: retrieval augmented generation assistant built with LangChain and a vector store.
